**DETAILED ACTION**

**CONTINUED EXAMINATION UNDER 37 CFR 1.114**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 02/27/2008 has been entered.

**STATUS OF THE CLAIMS**

2. Currently, claims 1-6 and 13-18 are canceled and claims 7-12 and 19-20 are pending for examination.

**I. ALLOWABLE SUBJECT MATTER**

3. Claims 7-12 and 19-20 are allowed.

The following is an Examiner's Statement of Reasons for Allowance. See MPEP 1302.14:

The primary reason for allowance of claims 7 and 19 in the instant application is the combination with the inclusion in the claim that there are "... performing an

adaptive baud rate negotiation ... sending a break key sequence from the external device to the storage controller; determining an amount of time between a start bit and a stop bit; and obtaining a baud rate based on the amount of time ... " The prior art of record including the disclosures of AAPA, Peters et al. (US Patent 4,999,766) and Walter et al. (US Patent 6,847,615) neither anticipates nor renders obvious the above recited combination. Because claims 8 and 20 depend directly on claims 7 and 19, these claims are considered to contain allowable subject matter for at least the same reasons noted above.

The primary reason for allowance of claim 9 in the instant application is the combination with the inclusion in the claim that there are "a method of performing an adaptive baud rate negotiation for serial port initialization in a storage controller, wherein the storage controller includes a serial port for connection to an external device, the method comprising:

sending a break key sequence from the external device to the storage controller;

determining an amount of time between a start bit and a stop bit;

obtaining a first baud rate based on the amount of time; and

setting a second baud rate for the serial port based on the first baud rate"

The prior art of record including the disclosures of AAPA, Peters et al. (US Patent 4,999,766) and Krulce (US Patent 6,072,827) neither anticipates nor renders obvious the above recited combination. Because claims 10-12 depend directly on claim 9, these

claims are considered to contain allowable subject matter for at least the same reasons noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
